A new way to see your school

# See the pupil behind the data

Pupil Asset's cloud-based MIS software enables effective leadership, connects your community, and empowers your staff.

Our powerful, flexible and customisable software will help your staff to harness data and realise the potential of every pupil in your school or MAT.

Pupil Asset has revolutionised the day-to-day business of school leaders and managers, teachers and office staff, throughout the UK and beyond. It enables effective leadership through informed decision making, helping you evaluate the impact of change and identify potential for improvement.

Make sense of your school's performance, streamline administrative processes and engage parents with Pupil Asset. Our tools for attendance, attainment, behaviour and communication offer your school the best chance of success.

# Get the best from your pupils

Empower your staff with the high quality assessment data they need to make informed decisions.

With Pupil Asset you don't have to compromise your approach to assessment to fit the rules of a system.

We know that every school and trust is unique. Context, accountability, ethos and pedagogy all play a part in designing your assessment model. Working in partnership, we'll help design a model that works for you, with ongoing support to help you get the most out of your data. We have built Pupil Asset to be flexible enough to support your needs.

Our suite of attainment and progress reports allow for in-depth cohort analysis, easily and quickly producing a detailed, in-depth and advanced picture of your classroom. You can feel confident that your stakeholders have the information they need and that your staff are able to see the pupils behind the data.

“Pupil Asset were great to work with in setting up our own framework. Rather than a one-size-fits-all approach like other systems, Pupil Asset adapts to our concept perfectly. Pupil Asset is far simpler to use than previous systems and class teachers have picked it up with minimal training. Now, teachers are able to easily track progress and act immediately.”

David How - Headteacher at Beaver Road, Manchester

# Target resources effectively across your Trust

Take advantage of your autonomy and reduce costs.

Pupil Asset software has been designed to adapt to you and the needs of your schools, rather than the other way around.

With Pupil Asset you can share accountability, reduce bureaucratic barriers and promote your shared ethos. Every staff member is empowered with the information they need. Your values and policies are easily reflected across your schools, giving each and every pupil the best chance of success.

We offer you the freedom to do what is best for your individual schools whilst maximising the benefits of working together. Target resources effectively, reduce costs and provide better outcomes for your learners.

“The adaptability is there so that you can use the system for the best outcome for your Trust, and staff can identify any support and progress of the children. You can build it around them and what they are learning and identify the children who are not progressing as far as you want them to.”

Stuart Renshaw – CEO of Celtic Cross Education in Cornwall

# Make informed leadership decisions

Work together, efficiently.

Making informed decisions is at the heart of effective leadership, increasing the demand for knowledge, which often results in the seemingly endless production of reports and data. Free your staff from this time burden by automating reports and removing the need for duplication with Pupil Asset.

Let your education team focus their valuable time on identifying the interventions or innovations which are improving pupil outcomes and sharing this learning with trustees, head teachers and other key stakeholders.

Pupil Asset's sophisticated access levels mean that all relevant stakeholders can be given the right access to the right areas for timely and effective monitoring and intervention. Our cluster view is simple, with easy-to-read reports providing those with cross-school responsibility the data they need, when they need it.

**“We’ve developed our own assessment system with Pupil Asset that matches both our approach and the needs of the Trust. It’s very robust and can be used nationally as a very strong model.”**

Simon Morely, Academies Improvement Director, Diocese of Norwich Education and Academies Trust.

# Give yourself time to do more

Let your staff focus on what's important - your pupils.

Your time is valuable. Pupil Asset's MIS and Pupil Tracking software helps you to spend it doing what's really important.

With the help of the 30,000 educators in our community, we have grouped tasks together logically so that the next step is exactly where you'd expect it. Assign meal choices while you take the register; send letters home from an attendance report; or message parents/carers directly from a calendar event. Pupil Asset enables you to define what you need to see and access that information quickly.

We listen to our schools to understand exactly what is needed, and as a result, our software streamlines and automates processes giving you time to do more.

“Pupil Asset helped us to evolve our system to make it do what we needed it to.”

Samantha Selby, Education Director,  
Bellevue Education

# Balance your budget in an uncertain climate

Create efficiencies so you can plan for your future.

With Pupil Asset you won't be shocked by hidden fees when the invoice arrives and you won't have to pay extra to unlock the most useful features.

Our software already contains the tools you need to improve your school environment. Secure payments, parent communications, our support team, assessment and behaviour tracking are all included. Instead of paying for endless numbers of school systems, you can consolidate your costs and plan for your future.

We can offer you discounts for longer term financial security and can support you with flexible payment plans for ongoing budgeting.
